

STEP BY STEP GUIDE

STEP 3: CHOOSING THE APPROPRIATE DIGIFLEX HARNESS

DETERMINE WHAT TYPE OF FUEL INJECTORS ARE ON YOUR VEHICLE

There are several different types of fuel injectors in use today and there is a specific DigiFlex harness for each type of injector.

To determine which DigiFlex harness your vehicle requires disconnect the wiring harness on your vehicle from a single fuel injector and compare the injector with the pictures of the Injector Types at the bottom of this page.

NOTE: When you are ready to place your order please be sure to scroll thru the page since we have some specialty units for Chrysler/Dodge/Jeep and Boxer/Pancake Engines.

HOW TO DISCONNECT THE WIRING HARNESS FROM AN INJECTOR

NOTE: The wiring harness from an injector may differ from model to model.

Start by looking for the mechanism that will release the lock. It will be on the sides or on the front of the injector connector (some connectors may have a metal clip), push this clip and it should release the connector.

If you need assistance, you can either ask your local mechanic or contact our Technical Support Department at 804-286-4374.

INJECTOR TYPES

PLEASE NOTE WHICH INJECTOR TYPE CONNECTOR YOU WILL NEED AND MAKE YOUR PROPER SELECTION WHEN YOU PLACE YOUR ORDER.

If you need assistance determining which injector type connector you will need, you can either check with a local mechanic or call us at 804-286-4374 and we will do our best to assist you.
